CAUTION: Read and understand this service bulletin thoroughly before starting. Only a trained, experienced service technician should attempt this service procedure.

Part # Description
8423-01R On/Off Switch Assembly

Figure 1 - On / Off Switch Replacement

Instructions

With White Plastic Connectors

If current set up includes white plastic connectors, then remove old part and replace with new.

1. Remove switch from front panel by squeezing the top and bottom and pushing out of the front.
2. Disconnect white connector and remove switch.
3. Attach new switch to front panel by pushing in until it clicks.
4. Connect new switch to the white connector.

Instructions

Without White Plastic Connectors

If current set up does not include white plastic connectors, follow steps to prepare for blue wire nuts.

1. Unscrew acorn nut and cover to get to wires.
2. Remove blue wire nut (2) connecting the on-off switch to the power cord and motor.
3. Remove switch from bracket by squeezing the top and bottom and pushing out of the front.
4. Prep new switch
 - a. Cut wire as close to connector as possible and remove connector.
 - b. Strip 0.5" from both wires.
5. Attach new switch to bracket by pushing in until it clicks.
6. Make sure to do the thing that needs to be done
7. This will help you do the thing you are trying to do
8. Eventually you will have done the thing you were trying to do
9. Then you choose a new thing
10. Connect wires using blue wire nuts per wire diagram.
11. Fit all wires back into box and tighten cover with acorn nut.

AVOID ERROR IN PARTS SELECTION. When ordering use complete EmberGlo Part Number and Description. Furnish the Product Model Number, Bill of Material Number and Serial Number (if available) from the specification plate found on the product.

IMPORTANT: Availability of parts as well as specifications are subject to change without notice. Please consult factory for item availability.
